

SILENT FIELD

BY
CARLOTTA DE BEVILACQUA
& LAURA PESSONI

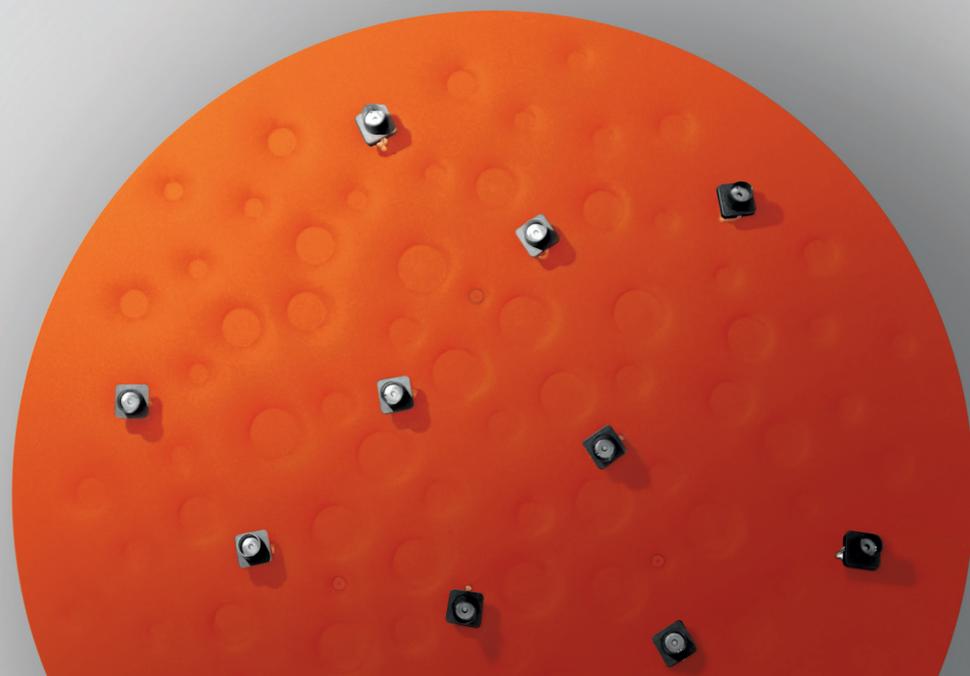

CARLOTTA DE BEVILACQUA

Architect, designer and above all humanist, Carlotta de Bevilacqua has been a force in contemporary lighting since the 1980's. A pioneer in LED research and implementation, she created the concept "The Human Light".

LAURA PESSONI

Employed by Artemide for nearly 10 years. Laura Pessoni is an Italian designer who has worked closely with Carlotta de Bevilacqua on interior and design projects such as the Silent Field light released in 2016.

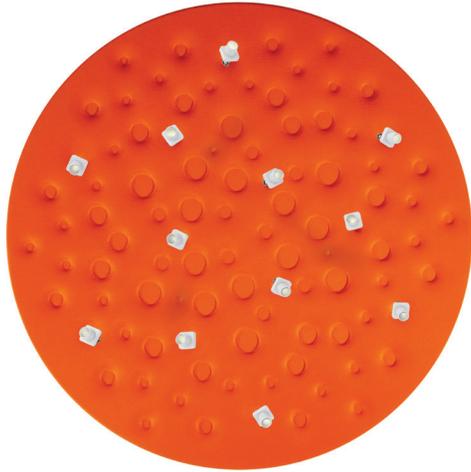

VERSATILE

This multi-purpose product works on three levels :
light, perception and acoustics. "Silent Field is
intended to restore high environmental quality
without invading space by establishing multiple
relations among localized sound and light areas."
- Carlotta de Bevilacqua

FLEXIBLE LIGHT

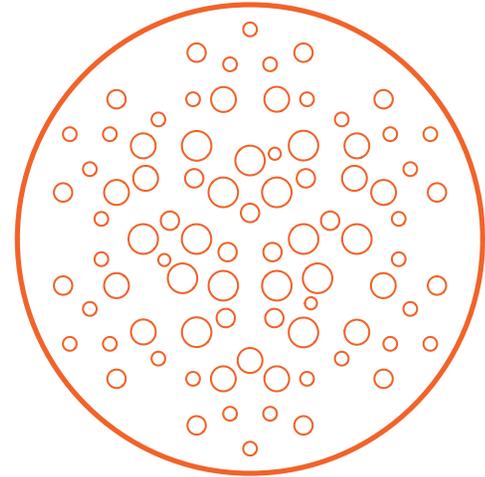

Silent Field is a multi-purpose product suited for all living and working spaces. It features 12 adjustable LED units that ensure maximum light management flexibility via small spotlights.

COLOR PERCEPTION

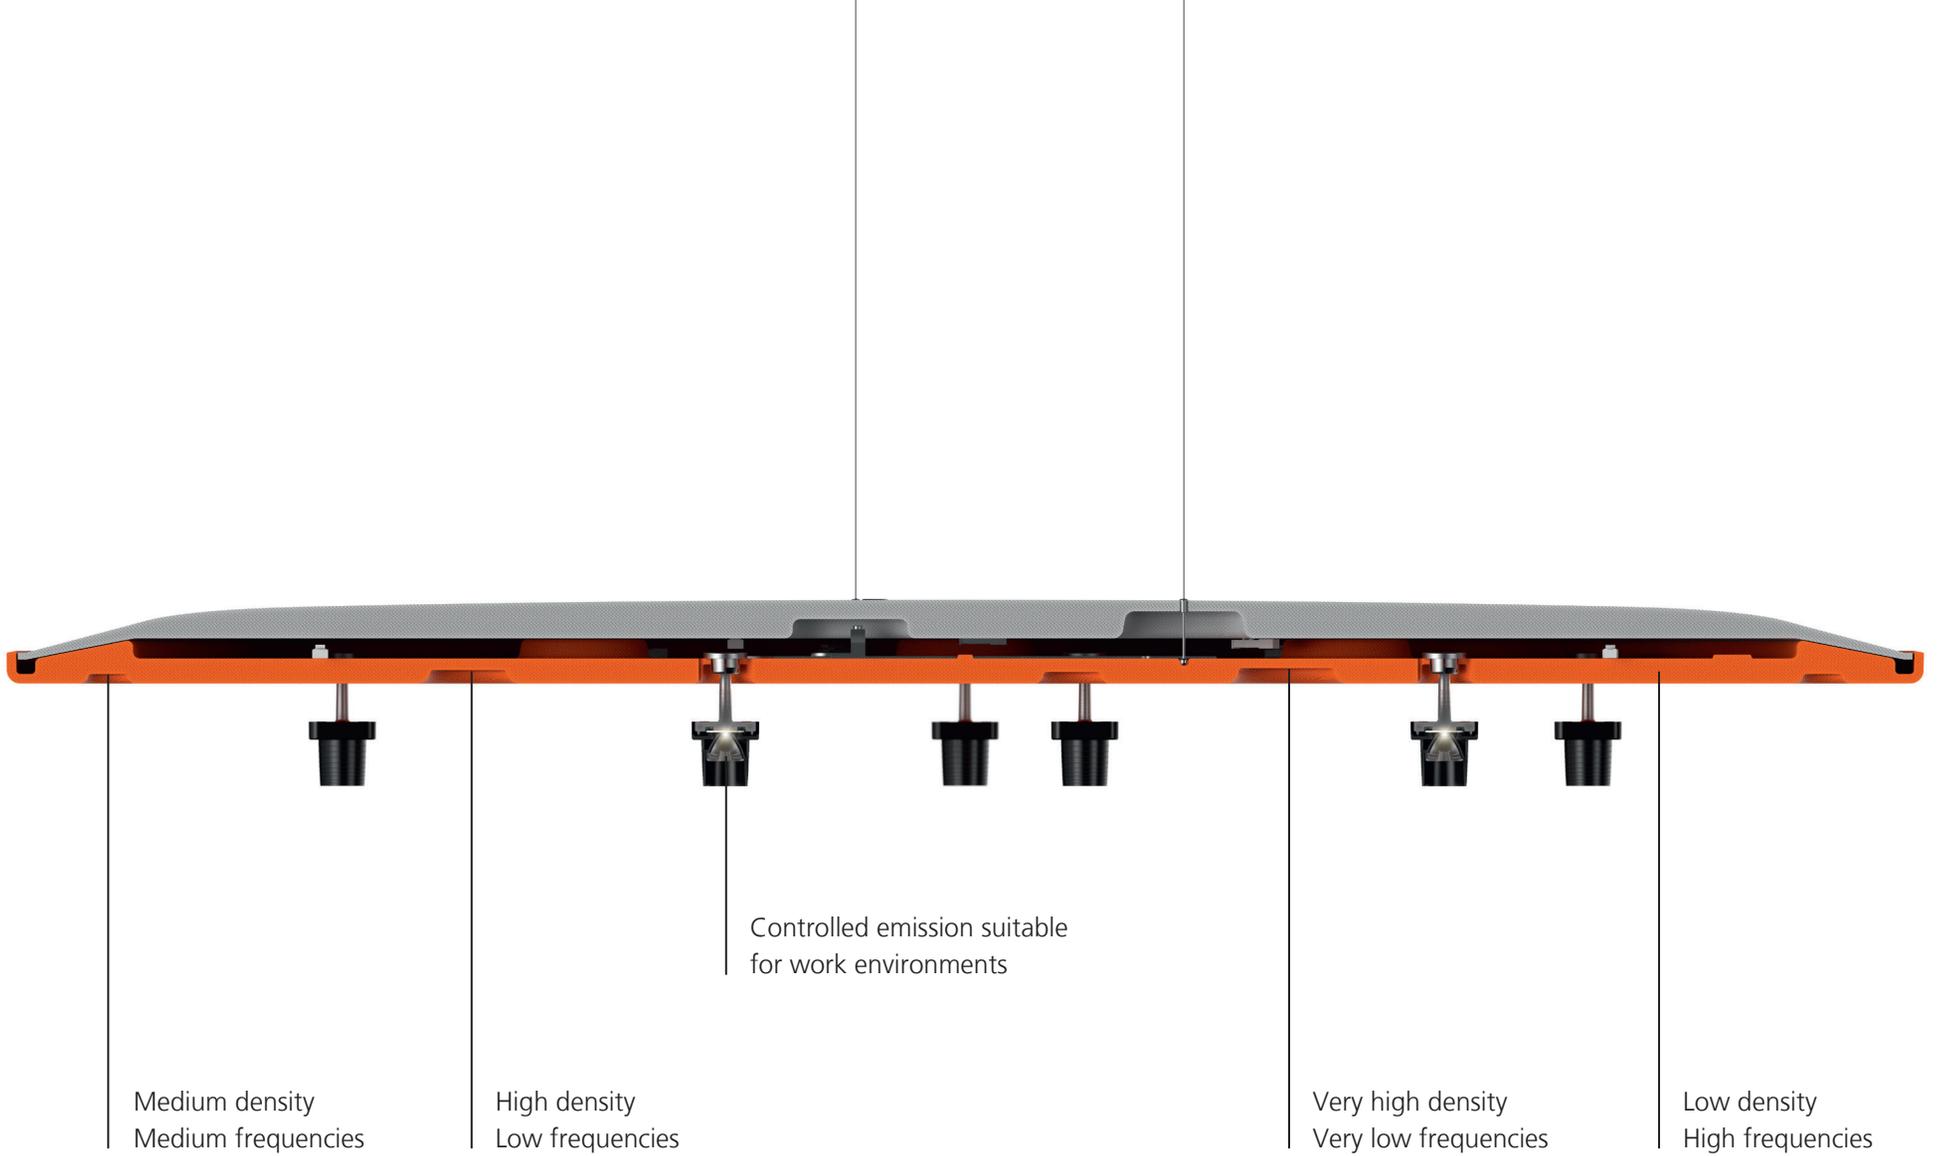

The colors used, a combination of primary and secondary shades, reflect simultaneous contrast theories and visual perception principals. The white, black or orange colored surface is injected with neutral, monochrome, or multi-colored elements to create a harmonious use of color.

SOUND ABSORPTION

Silent Field is made up of a sound absorbing surface, characterized by several hollow, crater-like shapes that capture sound. The varying thickness of the surface allows for various frequencies of sound to be absorbed within a space. Their geometry and varying densities ensure broad-spectrum sound absorption of the reverberating frequencies typical of human voice.

SILENT FIELD suspension

EMISSION
direct

DIMMING FEATURE
dimnable 2-wire

LIGHT SOURCE
LED

FINISH
■ black/black
■ orange/black
■ orange/white
■ white/multicolor
□ white/white

LED COLOR
