

# LOGICO

BY  
MICHELE DE LUCCHI  
GERHARD REICHERT

**MICHELE DE LUCCHI**

---

Born in Italy in 1961, Michele De Lucchi designed the Tolomeo in 1987. The lamp now available in sizes from mini to mega is arguably Artemide's most iconic fixture.

Having a background in architecture and industrial design, De Lucchi also favors a craftsman-like approach and since 1990 through the line "Produzione Privata," he has created a series of artisan-produced items such as small sculptures carved with a power saw.

**GERHARD REICHERT**

---

German designer Gerhard Reichert believes that emotion and function increase a product's intrinsic value. A mechanical engineer by training, he seeks to reconcile the utilitarian aspect of an object in relationship to the experience of use and its impact on both the personal and external environment.

## MODULAR

---

To enhance modern exteriors whether residential or hospitality spaces, Logico's availability in three heights allows the fixture to be configured in various patterns imagined by architects, designers, and customers to create unique exteriors.

## MODERN

Available in three heights, in a metallic black finish, Logico's sleek design and curved shape give a subtle modern feel to any exterior.

## TECHNOLOGY

---

Logico is composed of an extruded aluminum body and head with lighting module in die-cast aluminum, metallic polycarbonate screen, with shiny shock-resistant and anti-UV finish. While enhancing exteriors with its function and form, the fixture's LED technology ensures environmental friendly lighting and durability.
